Existing Land Use
Town of Whitingham, Vt.
May 2016
Natural Resources
Town of Whitingham, Vt.
May 2016

Data sources:
- Sites of natural or geologic interest were identified by Whitingham Planning Commission.
- Natural Heritage data are from VT Dept. of Fish and Wildlife, Nongame and Natural Heritage Program's Natural Heritage Inventory Database. This includes data on rare, threatened and endangered species and significant natural communities database (VGIS layer RTENA TCOM), and on uncommon species and other features (VGIS layer UNCOMSPOF).
- Wetlands data are from the Vermont Significant Wetlands Inventory (VGIS data layer VSWI) as of 2010. These include data on the original VSWI as well as maps from National Wetlands Inventory (NWI) maps, and show approximate locations of wetlands that are generally 3 acres or larger.
- Special Flood Hazard Area boundaries (i.e. "the 100-year floodplain") are from FEMA (Federal Emergency Management Agency) D-FIRM (Digital Flood Insurance Rate Map) data effective September 28, 2007.
- Deer wintering areas are taken from the VGIS data layer DEERWN. They were delineated by VT ANR, Department of Fish and Wildlife, and have been updated to a limited extent through 2011.
- Statewide River Corridors are from VT ANR Rivers Program 2015 data (VGIS data layer RIVERCORRIDORS).

* Official source of River Corridor data is tinyurl.com/floodreadyatlas. Where river corridors are not mapped, the corridor is taken to be the area within 50 feet of a perennial stream.
Proposed Land Use
Town of Whitingham, Vt.
May 2016

Data sources:
- Proposed land use district boundaries were developed by the Whitingham Planning Commission in 2009 and revised in 2016.
- Highway data are from Vt. Agency of Transportation system (VDA data layer, VGIS). Data were cleansed and updated by Windham Regional Commission in 2009 using information provided by the Towns of Whitingham, data from Vermont’s Enhanced 911 Board, and Vermont digital orthophotos.
- Surface waters are from the Vermont Hydrography Dataset (VGIS data layer, SW). The dataset was generated at a scale of 1:5000 and was developed using digital orthophotos, topographic maps, color infra-red aerial photography and other ancillary data sources.
